### Q2 results

I-tech reported very strong Q2 numbers. Sales came in at SEK 59m (+21% vs. ABGSCe 48m) with 91% organic growth. CEO writes that strong H1 provides a solid foundation for the remainder of 2026, with continued focus on customer growth, regulatory and business development, and strengthening Selektope's market position. On the EU process, I-Tech notes the Commission's draft act proposes non-renewal of medetomidine, the WTO-TBT consultation began in July, and an SCBP vote is likely in Q4.

## Analyst valuation methods

ABG Sundal Collier analysts may publish valuation ranges for stocks covered under Company Sponsored Research. These valuation ranges rely on various valuation methods. One of the most frequently used methods is the valuation of a company by calculation of that company's discounted cash flow (DCF). Another valuation method is the analysis of a company's return on capital employed relative to its cost of capital. Finally, the analysts may analyse various valuation multiples (e.g. the P/E multiples and the EV/EBITDA multiples) relative to global industry peers. In special cases, particularly for property companies and investment companies, the ratio of price to net asset value is considered. Valuation ranges may be changed when earnings and cash flow forecasts are changed. They may also be changed when the underlying value of a company's assets changes (in the cases of investment companies, property companies or insurance companies) or when factors impacting the required rate of return change.
