Record quarter for sales & orders as expected

- Q2 sales on par with FY'24, below ABGSCe only on delivery timings
- Deliveries likely pushed into H2, so limited impact on cons. estimates
- Company views Q2 as a breakthrough, optimistic on structural trends

Q2 results

Sales grew 691% y-o-y but were 35% below our estimate (8% below FactSet consensus). This was solely due to delivery timings, with four machines delivered in the quarter, compared to our expectation of six. The remaining two will very likely be delivered in H2 instead. As a result of this EBIT adj. was SEK 7.6m below our estimate (4.3m below consensus). Lease adj. FCF was -18m, bringing the R12m figure to -71m, i.e. 85% of net income. The company ended the quarter with a cash balance of 54m.

Estimate changes

We expect consensus EBIT adj. to come down by only a few SEKm despite the miss vs. consensus, since deliveries not completed in Q2 will likely be pushed into H2. With Q2 sales on par with FY'24 sales, the company considers the quarter a breakthrough, and remains optimistic on the structural growth trends for additive manufacturing.

Company valuation

Over the past three months, the share has returned +186%, compared to the peer median of +6% and the +3% of the OMX Stockholm Allshare. The share is currently trading at 6.8x-3.3x '25e-'27e EV/Sales, compared to its 10-year historical median of 6.0x-1.8x and peers at 0.9x-0.6x.

This report is produced by ABG Sundal Collier, which may cover companies either in accordance with legal requirements designed to promote the independence of investment research (“independent research”) or as commissioned research. Commissioned research is paid for by the subject company. As such, commissioned research is deemed to constitute an acceptable minor non-monetary benefit (i.e., not investment research) as defined in MiFID II.

Analyst valuation methods

ABG Sundal Collier analysts may publish valuation ranges for stocks covered under Company Sponsored Research. These valuation ranges rely on various valuation methods. One of the most frequently used methods is the valuation of a company by calculation of that company's discounted cash flow (DCF). Another valuation method is the analysis of a company's return on capital employed relative to its cost of capital. Finally, the analysts may analyse various valuation multiples (e.g. the P/E multiples and the EV/EBITDA multiples) relative to global industry peers. In special cases, particularly for property companies and investment companies, the ratio of price to net asset value is considered. Valuation ranges may be changed when earnings and cash flow forecasts are changed. They may also be changed when the underlying value of a company's assets changes (in the cases of investment companies, property companies or insurance companies) or when factors impacting the required rate of return change.

Expected updates

ABGSC has no fixed schedule for updating its research reports. Unless expressly stated otherwise, ABGSC expects (but does not undertake) to issue updates when considered necessary by the research department, for example following the publication of new figures or forecasts by a company or in the event of any material news on a company or its industry.
