Q4: Sweden shows strength

- Net sales SEK 557m, +5% vs ABGSCe, +4% vs Factset cons.
- EBITA SEK 87m, +10% vs ABGSCe, +7% vs cons
- Outlook: gradually better market

Q4 in brief: Better across all markets

Our impression is that Svedbergs Group's Q4'25 report is better than Factset consensus estimates overall. The Group reports net sales of SEK 557m, for organic growth of 10% y-o-y. This is +5% vs ABGSCe and +4% vs cons. Looking closer at the three largest segments, Svedbergs grew 19%, Roper Rhodes by -4% (+6.5% org.) and Thebalux by 6% (11% org.), which means the deviation to our sales estimate was driven by Svedbergs and Thebalux. All segments delivered positive org. growth and all except Roper Rhodes deliered an improved margin y-o-y. Roper Rhodes' margin decline was driven by a positive margin impact from freight provisions in the comparable quarter, and was expected. Gross margins grew -50bp y-o-y to 47.2%, the freight provisions explain the decline in full according to our understanding. Despite the softer gross margin, EBITA margins expanded 40bp y-o-y, for EBITA of SEK 87, +10% vs ABGSCe and +7% vs cons. This is partly due to a strong margin development in the Svedbergs brand, which improved 5pp y-o-y. Svedbergs' board has proposed a dividend per share of SEK 2, just shy of 50% of '25 EPS, which can be compared to our DPS forecast of SEK 1.75 (based on a 50% payout ratio as well).

Outlook: Looks forward to a gradually better market

In the Q3 report, Svedbergs Group said the current market climate remained uncertain but manageable, and we assessed that the message was of a delayed recovery driven by this uncertainty. In Q4, it says that while the market outlook is still uncertain, it looks forward to a gradual market improvement during the year.

The share is trading at 11x-10x '26e-'27e EV/EBITA

The share has returned 8% L3M, and is now trading at 11x-10x our '26e-'27e EV/EBITA vs a historical trading range of 7x-11x NTM. The Q4 report moves consensus' '25e EBITA by 2%.

This report is produced by ABG Sundal Collier, which may cover companies either in accordance with legal requirements designed to promote the independence of investment research ("independent research") or as commissioned research. Commissioned research is paid for by the subject company. As such, commissioned research is deemed to constitute an acceptable minor non-monetary benefit (i.e., not investment research) as defined in MiFID II.

Analyst valuation methods

ABG Sundal Collier analysts may publish valuation ranges for stocks covered under Company Sponsored Research. These valuation ranges rely on various valuation methods. One of the most frequently used methods is the valuation of a company by calculation of that company's discounted cash flow (DCF). Another valuation method is the analysis of a company's return on capital employed relative to its cost of capital. Finally, the analysts may analyse various valuation multiples (e.g. the P/E multiples and the EV/EBITDA multiples) relative to global industry peers. In special cases, particularly for property companies and investment companies, the ratio of price to net asset value is considered. Valuation ranges may be changed when earnings and cash flow forecasts are changed. They may also be changed when the underlying value of a company's assets changes (in the cases of investment companies, property companies or insurance companies) or when factors impacting the required rate of return change.

Expected updates

ABGSC has no fixed schedule for updating its research reports. Unless expressly stated otherwise, ABGSC expects (but does not undertake) to issue updates when considered necessary by the research department, for example following the publication of new figures or forecasts by a company or in the event of any material news on a company or its industry.
