

## **Unleashing its potential**

- Decentralised, diversified B2B distribution and original product group
- New management aims to boost profitability, promising signs in H1'23
- '23e-'25e adj. P/E of 12-10x, fair value SEK 30-40

### Overlooked and poorly understood

We think Christian Berner Tech Trade is an overlooked company with limited institutional ownership despite good potential for increased profitability and stable growth, driven by the new management's work to improve efficiency, and a growing demand for high-quality clean energy and water solutions. The company is a decentralised, diversified B2B business group with subsidiaries acting as distributors and sellers of original products in areas such as clean energy, clean water, packaging, process technology and noise reduction. The company has arguably delivered below its potential in recent years, with limited organic growth and low profitability. This is changing, as new management took over in H1'22, and has since been working hard to improve operational efficiency. This is an ongoing process, but promising signs were seen in H1'23, as sales grew 22.5% organically, and order intake remained strong. The EBITA margin was up 2pp y-o-y, and ROE and ROCE were >20%.

### Zander & Ingeström: a case study

Earlier this week, we visited one of the group's largest subsidiaries, Zander & Ingeström, acquired in 2018. This company focuses on industrial electrical water boilers and industrial pumps. Both of these segments see significant drivers in the increasingly strict regulations on energy efficiency, workplace safety and environmental sustainability. Since 2009, the company has grown sales at a CAGR of 8%, and averaged an EBIT margin of 12%. Since the acquisition, sales growth has accelerated, reaching a CAGR of 12% during 2018-22, and on average the EBIT margin improved by 2pp. We think it is fair to say this was an excellent acquisition.

### Fair value SEK 30-40

Despite its potential, the company is trading at '23e-'25e adj. P/E of 12-10x, 50-40% below peers. We reiterate our fair value range of SEK 30-40.

## **Company description**

Christian Berner Tech Trade is a decentralised group of B2B businesses acting both as distributors and selling their own products. The product base is very diversified, but the common theme is technical solutions for sustainable industry within clean energy, clean water, packaging, process technology and noise reduction. Examples of important products are industrial electrical water boilers, pumps, packaging machinery and industrial dampers.

## **Risks**

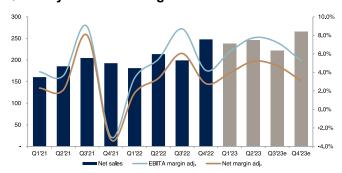

Downturns in the industrial cycle, difficulties in improving underperforming subsidiaries, acquisition integration issues, inflated acquisition multiples.

# A company with renewed purpose

## **Brief history**

Christian Berner Tech Trade is a decentralised group of B2B businesses acting both as distributors and selling their own products. The product base is very diversified, but the common theme is technical solutions for sustainable industry within clean energy, clean water, packaging, process technology and noise reduction. Examples of important products are industrial electrical water boilers, pumps, packaging machinery and industrial dampers. The company has a history of growing both organically and through M&A activity.

The company has 125 years of history, but has arguably delivered below its potential in more recent years, with an organic sales CAGR of 1.2% (total 11.6%) during 2016-21, and a cumulative EBITA margin of 6.2%, which trended down throughout 2018-21. The company's results have also been quite volatile, making predictions more difficult.

## A change in management

In the first half of 2022, Caroline Reuterskiöld took over as CEO of the company and later that year she was joined by Henrik Nordin who took over as CFO. Since then, the new management has begun working to unleash the potential of the business group. The aim is to achieve the company's financial targets: 10% annual sales growth including M&A, 9% EBITA margin, >35% equity ratio, >25% ROE, dividend of 30-50% of net income; by returning the group to an efficient structure enabled through a focus on decentralisation and entrepreneurship. Among other things, this implies some restructuring, overseeing the division of responsibilities and replacing old systems.

## **Progress**

Over the past one and a half years, progress has started being made. In an effort to improve the decentralised structure and get access to key talent, the group management has moved from one of the subsidiaries in Gothenburg, to a standalone office in Stockholm. The segment reporting structure of the group has been changed to better reflect the way the businesses operate, half the subsidiaries have got new CEOs, and the group and several subsidiaries have got more efficient accounting systems. There is also ongoing work to reduce the volatility in results by improving the project accounting.

Other ongoing projects aim to reduce costs and decrease working capital. Management is quite happy with the group's gross margin, which has been relatively stable around 40%, and is instead focusing on reducing opex. Steps have been taken to achieve this, such as eliminating some unnecessary admin expenses through the actions mentioned above, and reducing external costs by cutting back on consultants, but management believes there is still a lot to be done here.

H1'23 was a good half-year for the company, as the group accelerated the execution on its order book, and the aforementioned efforts to improve efficiency slowly started affecting reported numbers positively. Sales grew 22.5% organically, only partly boosted by inflation, and order intake remained higher than sales (108%). The EBITA margin was 6.6%, up from 4.6% in H1'22, despite some extraordinary expenses (7.0% adj.). Both ROE and ROCE were above 20%. We think this provides support for the thesis that management is on the right path and is making progress. While it is too soon to conclude that the company will reach its 9% EBITA margin target, we do incorporate a more modest margin expansion into our estimates (adj. EBITA margin '23e 6.5%, '24e 6.7%, '25e 7.0%). Even at these modest estimates, the company is trading at '23e-'25e adj. P/E of 12-10x, 50-40% below peers.

### M&A

No acquisitions have been made since the beginning of 2021. According to management, the main reason for this has been that sellers have demanded unreasonable acquisition prices, but discussions with potential targets have continuously been ongoing. More recently, they have seen that sellers' expectations are beginning to temper, and they hope to be able to continue the company's acquisition journey in the near future. The company has a fairly solid balance sheet, with SEK 52m in cash, and a lease adj. ND/adj. EBITDA of 1.8x.

## Zander & Ingeström: a case study

Earlier this week, we visited one of the group's largest subsidiaries (~25% of sales, >35% of EBIT), Zander & Ingeström, which was acquired in 2018. This company focuses on two product categories: industrial electrical water boilers and industrial pumps. Both of these segments see significant drivers in the increasingly strict regulations on energy efficiency, workplace safety and environmental sustainability.

## Thermal technology ~40% (electrical water boilers)

Within thermal technology, the company sells mostly its own products, although production is outsourced. The products are industrial electrical water boilers of different sizes, ~75% of which are used to produce vapour for industrial processes, and ~25% are used for district heating. These are not small household boilers, and can typically contain 45 cubic meters of water being heated at very high effects. The greatest growth inhibitor for this business unit is the lacklustre electrical infrastructure in many countries, which prevents many interested customers from trying to make the switch from e.g. gas boilers. This is a particularly pertinent issue at the moment as many are trying to make the switch to avoid dependance on Russian gas. On the other hand, this will likely encourage governments to invest in their electrical infrastructure to resolve this issue.

## Flow technology ~40% (pumps)

Within flow technology, the company mostly acts as a distributor. The products are mainly pumps of all kinds with end markets within industry (~30%), food, beverages and pharma (30%), high-pressure applications (~25%), and water and sewage (~15%). We highlight the significant exposure to food, beverages, pharma and water and sewage, as this is likely minimally cyclical.

### Services ~20%

The company also provides aftermarket services for its customers, which typically have a higher margin, and builds long-term customer relationships.

### **Performance**

Since 2009, the company has grown sales at a CAGR of 8%, and averaged an EBIT margin of 12%, at an average ROCE of ~50%. The company was acquired in 2018 at an EV of SEK 125m, corresponding to an LTM EV/EBIT of 7.6x, or an NTM EV/EBIT of 4.1x. Since the acquisition, sales growth has accelerated, reaching a CAGR of 12% during 2018-22, and the EBIT margin has gone from averaging 11% during 2009-17, to averaging 13% during 2018-22. Total EBIT during 2018-22 came in at SEK 125m, exactly matching the acquisition EV. Based on this, we think it is fair to say this was an excellent acquisition.

## Conclusion

We think Christian Berner Tech Trade is an overlooked company with limited institutional ownership despite good potential for increased profitability and stable growth, driven by the new management's work to improve efficiency, and a growing demand for safe, high-quality clean energy and water solutions. The company's diversified operations, with exposure to multiple products, geographies and sectors, such as industry, food, pharma, construction and infrastructure, provide it with flexibility and resilience in shifting markets and economies. The continued M&A ambitions constitute a good way to deploy the cash generated by the group companies, and we believe this will boost growth beyond our estimates. On our estimates, the company is trading at '23e-'25e adj. P/E of 12-10x, 50-40% below peers. We reiterate our fair value range of SEK 30-40.

## **Analyst Certification**

We, ABGSC Capital Goods Research and Henric Hintze, analyst(s) with ABG Sundal Collier ASA, ABG Sundal Collier Denmark, filial af ABG Sundal Collier ASA, Norge, ABG Sundal Collier AB and/or ABG Sundal Collier Limited (hereinafter collectively referred to as "ABG Sundal Collier"), and the author(s) of this report, certify that not withstanding the existence of any such potential conflicts of interests referred to below, the views expressed in this report accurately reflect my/our personal view about the companies and securities covered in this report. I/We further certify that I/We has/have not been, nor am/are or will be, receiving direct or indirect compensation related to the specific recommendations or views contained in this report.

This report is produced by ABG Sundal Collier, which may cover companies either in accordance with legal requirements designed to promote the independence of investment research ("independent research") or as commissioned research. Commissioned research is paid for by the subject company. As such, commissioned research is deemed to constitute an acceptable minor non-monetary benefit (i.e., not investment research) as defined in MiFID II.

### **Analyst valuation methods**

ABG Sundal Collier analysts may publish valuation ranges for stocks covered under Company Sponsored Research. These valuation ranges rely on various valuation methods. One of the most frequently used methods is the valuation of a company by calculation of that company's discounted cash flow (DCF). Another valuation method is the analysis of a company's return on capital employed relative to its cost of capital. Finally, the analysts may analyse various valuation multiples (e.g. the P/E multiples and the EV/EBITDA multiples) relative to global industry peers. In special cases, particularly for property companies and investment companies, the ratio of price to net asset value is considered. Valuation ranges may be changed when earnings and cash flow forecasts are changed. They may also be changed when the underlying value of a company's assets changes (in the cases of investment companies, property companies or insurance companies) or when factors impacting the required rate of return change.

### Important Company Specific Disclosure

The following disclosures relate to the relationship between ABG Sundal Collier and its affiliates and the companies covered by ABG Sundal Collier referred to in this research report.

Unless disclosed in this section, ABG Sundal Collier has no required regulatory disclosures to make in relation to an ownership position for the analyst(s) and members of the analyst's household, ownership by ABG Sundal Collier, ownership in ABG Sundal Collier by the company(ies) to whom the report(s) refer(s) to, market making, managed or co-managed public offerings, compensation for provision of certain services, directorship of the analyst, or a member of the analyst's household, or in relation to any contractual obligations to the issuance of this research report.

ABG Sundal Collier has undertaken a contractual obligation to issue this report and receives predetermined compensation from the company covered in this report.

ABG Sundal Collier is not aware of any other actual, material conflicts of interest of the analyst or ABG Sundal Collier of which the analyst knows or has reason to know at the time of the publication of this report.

Production of report: 9/14/2023 06:26.

All prices are as of market close on 13 September, 2023 unless otherwise noted.
