Q3 fairly in line, rights issue announced

- Sales SEK 14m vs. ABGSCe 10m, EBIT in line at SEK -12m
- No machine deliveries in the quarter (in line with estimates)
- Rights issue of ~SEK 87m announced, ~52% discount

Q3 results

Sales came in at SEK 14m (vs. ABGSCe 10m), -57% y-o-y. EBIT was SEK -12m, in line with estimates (ABGSCe -12m). There were no machine deliveries during the quarter, in line with our estimates. Sales was therefore entirely driven by Coating Services (SEK 10.6m) and Aftermarket (SEK 3m). In terms of costs, the opex. base was lower than expected at SEK -16m vs. ABGSCe SEK -19.5m. This indicates the early signs of success of the company's cost-saving initiatives. The company ended the quarter with a cash balance of SEK 13m (vs. ABGSCe 12m).

Rights issue of ~SEK 87m

On numbers alone, '25e-'27e sales change by 4%, and EBIT adj. changes by -2%. The company writes that its liquidity planning has been tied to forecasted flow of system orders, which has been delayed as time has elapsed. Management believes these delays are due to a cautious investment environment in parts of the energy sector in which Impact operates, but reiterates that it remains confident that demand remains intact. Due to the company's current financial position the company this morning announced its intention to launch a rights issue of ~SEK 87m at a subscription rate of SEK 1.5 per share, a discount of ~52% to yesterday's closing price. The company has received subscription commitments from existing shareholders and members of the Board and Management, corresponding to ~SEK 2.4m (~2.7% of the rights issue). Assuming the rights issue is fully subscribed, it will result in a dilution effect of ~40%.

Valuation

The share has returned -19% L3M (vs. peer median -5% and OMX Stockholm Allshare +4%), and is currently trading at 3.1x-2.0x '25e-'27e EV/Sales on our pre-report estimates vs. the peer median of 1.5x-0.7x. The company will be hosting a presentation in connection with its Q3 report at 09:00 CEST. Link here.

This report is produced by ABG Sundal Collier, which may cover companies either in accordance with legal requirements designed to promote the independence of investment research ("independent research") or as commissioned research. Commissioned research is paid for by the subject company. As such, commissioned research is deemed to constitute an acceptable minor non-monetary benefit (i.e., not investment research) as defined in MiFID II.

Analyst valuation methods

ABG Sundal Collier analysts may publish valuation ranges for stocks covered under Company Sponsored Research. These valuation ranges rely on various valuation methods. One of the most frequently used methods is the valuation of a company by calculation of that company's discounted cash flow (DCF). Another valuation method is the analysis of a company's return on capital employed relative to its cost of capital. Finally, the analysts may analyse various valuation multiples (e.g. the P/E multiples and the EV/EBITDA multiples) relative to global industry peers. In special cases, particularly for property companies and investment companies, the ratio of price to net asset value is considered. Valuation ranges may be changed when earnings and cash flow forecasts are changed. They may also be changed when the underlying value of a company's assets changes (in the cases of investment companies, property companies or insurance companies) or when factors impacting the required rate of return change.

Expected updates

ABGSC has no fixed schedule for updating its research reports. Unless expressly stated otherwise, ABGSC expects (but does not undertake) to issue updates when considered necessary by the research department, for example following the publication of new figures or forecasts by a company or in the event of any material news on a company or its industry.
